

Circular No. SGS/2023-24/0016

Date: 28/07/2023

Dear Parent,

Namaskar!

***"For enjoyment, comfort and things of taste; We face disease and radiation if there is e-waste"***

— *Sohiela Sharma*

As a part of our Global Perspective and Environment Education initiative, we are proud to announce our Project **E- SANCHAY** (an E-waste collection drive).

E-waste is an electronic waste, such as old phones, chargers, power banks, wires, headphones, etc. We should recycle e-waste to protect the environment. When we throw away electronic devices, they can harm the Earth. But on the other hand, when we recycle them, we can use the useful parts and make new things. Recycling e-waste helps us use less of new materials and reduces pollution. It's important to recycle to keep our planet clean and healthy for the future.

Our Eco-warriors from Grade 8<sup>th</sup> have taken the initiative to collect E-Waste and further send it for proper disposal. They will be placing small e-waste bins in all classes from Grades 1-8 where we would request our fellow school mates to bring and keep any type of e-waste.

List of E-waste

- old phones
- used up batteries
- used wires and switches
- used headphones
- used keyboards and chips
- old remotes

Let's remember, we must recycle e-waste to keep our environment safe, healthy and prevent hazardous accidents to keep our selves safe. E- waste bins will be in classroom till 31/07/2023.

Thanks & Regards

Ms. Shweta Tyagi

Middle Wing Coordinator (Sparsh Global School)
